

Why offer FlexCare \$0 Consult Fee Telemedicine?

FlexCare
A Telehealth Solutions Provider

Physician shortages in the U.S. are large and growing. Americans are waiting longer and traveling farther to see a doctor. And the longer they wait, the costlier their care could become. FlexCare telemedicine can help bridge these gaps with high quality care delivered anytime, anywhere.

Increasing wait times and costs

149K Projected shortfall of primary care physicians in the U.S. by 2020¹

24.1 Average number of days a patient waits for a first-time visit with a doctor²

\$10.3K Average annual cost of healthcare per person in the U.S. in 2016—an increase of 4.3% from 2015³

Bridging the gap

National network of board-certified physicians averaging 15 years of practice experience

Doctors available anytime, day or night, even on weekends and holidays

\$210 average savings per visit⁴

Drive registration and awareness with customized engagement strategies
